Mr. Travis has more than 21 years of investment experience. He holds a BA in Economics from Denison University and an MBA from Case

Western Reserve University. Mr. Travis holds the Chartered Financial Analyst (CFA) designation.

FUND INVESTMENT STRATEGY

Pin Oak Equity Fund is an all cap fund that seeks long-term capital appreciation by concentrating investments in stocks the manager believes are underappreciated by the market, irrespective of market capitalization.

The investment process begins with an analysis of the economy and various macroeconomic factors, followed by an evaluation of specific sectors and industries. It then focuses on the most attractive companies in these areas, based on qualitative and quantitative factors. Behavioral finance plays a large role in the management of the Fund, as does the disparity between the manager's investment time horizon and that of the increasingly short-term oriented market.

Despite the focus on growth stocks, the manager incorporates the idea of fundamental value into stock analysis, searching for opportunities that not only offer potential for growth in sales and earnings, but which are underappreciated by the market. This value can present itself not only in the traditional form of various quantitative metrics, but also in the form of a superior business model. Industry weightings and stock selection are based on fundamental analysis and an assessment of a stock's risk-reward.

ABOUT THE ADVISOR

Oak Associates, *ltd.* is a nationally recognized growth equity investment advisor. Founded in 1985, Oak Associates has managed quality growth portfolios for national endowments, public pension plans, private clients, and mutual fund investors. A concentration in key growth areas, diligent research and a focus on long-term performance have been integral to the company's success. Oak Associates takes very seriously the trust that its clients and shareholders place with the firm. It is worth noting that employees, friends and family of Oak Associates are among the largest investors in Oak's mutual funds. As fellow shareholders, employees have a vested interest in ensuring that the highest standards are maintained and that the portfolios are positioned for future growth.

To determine if this fund is an appropriate investment for you, carefully consider the fund's investment objectives, risk factors, charges and expenses before investing. This and other information can be found in the fund's prospectus, which may be obtained by calling 1-888-462-5386 or visiting our website at www.oakfunds.com. Please read it carefully before investing.

Mutual fund investing involves risk, including the possible loss of principal. The value of the Fund's investments will vary from day to day in response to the activities of individual companies and general market and economic conditions.

The Russell 3000 Index is an equity index that encompasses the 3,000 largest U.S.-traded stocks, in which the underlying companies are all incorporated in the U.S. One cannot invest directly in an index. The Lipper Multi-Cap Core Funds Average is an average of funds that invest in a variety of market capitalization ranges without concentrating 75% of their equity assets in any one market capitalization range over an extended period of time. Multi-cap core funds typically have an average price-to-earnings ratio, price-to-book ratio, and three-year sales-per-share growth value, compared to the S&P SuperComposite 1500 Index.

Alpha - Measure of risk-adjusted performance. Beta - A quantitative measure of the volatility of a given stock relative to the overall market. R2 - A correlation measure between daily returns on the stock and the index's average returns. Standard Deviation - A measure of a security's stability over a given period of time. Sharpe Ratio - Measures risk-adjusted performance. PIB Ratio represents equity securities within the Fund's portfolio, and is not intended to demonstrate Fund growth, income earned by the Fund, or distributions made by the Fund. P/E Ratio is a valuation ratio of a company's current share price compared to its per-share earnings. Turnover is the number of shares traded for a period as a percentage of the total shares in a portfolio or of an exchange.
